C/ Méndez Álvaro, 44  
28045 Madrid, Spain

Trond-Erik Johansen  
President, ConocoPhillips Alaska  
700 G St #1950  
Anchorage, AK 99501

**Sent via email**

Dear Ms. Weiss, Mr. Tillerson, Mr. Brufau and Mr. Johansen:

As you know, state forecasts in our bi-annual Revenue Sources Book show oil production falling under the law you are pushing, SB 21, from over 500,000 barrels/day to 315,000 barrels/day by 2023 (Spring 2014 Revenue Sources Book), and to 285 barrels/day by 2024 according to a February 2014, Alaska Office of Management and Budget forecast.

In contrast, many of your ads claim SB 21 is leading to "more production." A 40% - 45% decline in production is not "more production".

I am writing to ask that your companies stop telling the public SB 21 is creating "more production when it is creating a 40%-45% production decline in the next decade.

The August referendum is important. It is more important that voters be honored, and not be misled.

Thank you,

A handwritten signature in black ink, appearing to read "Les Gara".
